Sibusiso Teyise

I'm Sibusiso "Sibu" Teyise, a Quality-driven professional with a deep foundation in Quality Management Systems (QMS), Six Sigma methodologies, and continuous improvement. My career spans quality assurance, operations, and engineering across the tech, construction, and manufacturing sectors. I proudly led the Quality department in successfully obtaining ISO 9001:2015 certification at River Bioscience, underscoring my ability to align teams, systems, and standards with operational excellence.

With a solid grounding in computer technologies, I bring practical expertise in web development, hardware installation, cybersecurity, and emerging technologies like artificial intelligence, virtual reality, and machine learning. I am proficient in tools such as Minitab, Microsoft Office (2000–365), SAP, Sage, and HP's Micro-enterprise development platform, with additional skills in Python for Scientists and Engineers.

I hold a Six Sigma DMAIC Black Belt Test Mastery, and my ongoing academic journey includes a National Diploma in Management and enrolment in an Advanced Diploma in Quality Management. I am certified in operations management, HACCP, APQP, FMEA, and SPC, among others, enabling me to seamlessly integrate quality frameworks into any environment.

As a tech-savvy innovator, I continuously seek to merge quality with technology to drive impactful solutions.

- Quality Engineering
- Quality Control & Assurance
- Production & Process Improvements
- Health, Safety and Environmental Compliance (HSE)
- Document Control and DATA Management
- Information Technology and AI
